National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, *How to Complete the National Register of Historic Places Registration Form*. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. **Place additional certification comments, entries, and narrative items on continuation sheets if needed (NPS Form 10-900a).**

1. Name of Property

historic name New Deal Resources in Babcock State Park Historic District
other names/site number _____

2. Location

street & number 486 Babcock Road ☐ not for publication
city or town Clifftop ☐ vicinity
state West Virginia code WV county Fayette code 019 zip code 25411

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended,

I hereby certify that this X nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.

In my opinion, the property X meets does not meet the National Register Criteria. I recommend that this property be considered significant at the following level(s) of significance:

 national X statewide local

Deputy State Historic Preservation Officer

Signature of certifying official/Title

Date

West Virginia State Historic Preservation Office

State or Federal agency/bureau or Tribal Government

In my opinion, the property meets does not meet the National Register criteria.

Narrative Description

(Describe the historic and current physical appearance of the property. Explain contributing and noncontributing resources if necessary. Begin with a **summary paragraph** that briefly describes the general characteristics of the property, such as its location, setting, size, and significant features.)

New Deal Resources in Babcock State Park
Historic District
Name of Property

Fayette County, WV
County and State

Summary Paragraph

Babcock State Park includes 4,127 acres in Fayette County. The park is west of the town of Clifftop and adjacent to the New River. The elevations within the park range from 900 feet at the western side near the site of the former Town of Sewell up to 2,700 feet. The park is largely wooded. Glade Creek and Mann's creek are the largest water ways within the park, but a number of smaller branches and tributaries are contained within its boundaries as well. The CCC-era resources described in this nomination are all found in the eastern half of the park, near its main entrance off County Route 41. The two main clusters of resources are found at the headquarters building with a series of cabins found along Glade Creek; and an additional cabin and recreation area to the north. With the exception of NF-804, a road that links the eastern part of the park to the western part of the park, there are no CCC-built resources in the western half of the park. The road follows a ridge that runs south of and roughly parallel to Mann's Creek as they both head towards the New River which is west of the park boundary. The park as a whole has stony soil including sandstone formations. The forested areas include pitch pine, scarlet oak, red maple, sourwood, black gum and eastern hemlock. Mountain laurel, rhododendron, and black huckleberry are found in the understory.

Narrative Description

Large portions of Babcock State Park are undeveloped. The developed area is in the eastern half of the park. Those resources constructed by the Civilian Conservation Corps (CCC) are found in four principal areas: the entrance area, the headquarters area, the Mann's Creek area, and the support area. The narrative description that follows describes the park in terms of these areas.

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

☒ A Property is associated with events that have made a significant contribution to the broad patterns of our history.

☐ B Property is associated with the lives of persons significant in our past.

☒ C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.

☐ D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

☐ A Owned by a religious institution or used for religious purposes.

☐ B removed from its original location.

☐ C a birthplace or grave.

☐ D a cemetery.

☐ E a reconstructed building, object, or structure.

☐ F a commemorative property.

☐ G less than 50 years old or achieving significance within the past 50 years.

Statement of Significance Summary Paragraph (Provide a summary paragraph that includes level of significance and applicable criteria.)

The New Deal Resources in Babcock State Park Historic District is associated with the New Deal Resources in West Virginia State Parks and Forests Multiple Property Listing. Babcock State Park was developed in partnership with the federal government through construction by the Civilian Conservation Corps (CCC) and design counsel from the National Park Service (NPS). The Babcock State Park Historic District is associated with the following historic contexts as listed in the New Deal Resources in West Virginia State Parks and Forests Multiple Property Listing: State Park and Forest Development in West Virginia, 1933-1942; New Deal Federal Relief Programs in West Virginia State Parks and Forests, 1933-1942; Rustic Style Architecture in West Virginia State Parks and Forests, 1933-1942; and Landscape Design and Landscape Management in West Virginia State Parks and Forests, 1933-1942. The historic district is significant at the state level under Criterion A in the areas of Social History, Politics/Government, Conservation, and Entertainment/Recreation for its association with New Deal federal work relief programs, with conservation programs that were a partnership between federal and state government implemented through the CCC, and with recreational development in the state of West Virginia. The historic district is significant under Criterion C for Architecture for its rustic architecture as designed and carried out by the CCC and for its landscape planning designed with assistance from the NPS. The period of significance, 1934-1942, is the combined tenure of the CCC Camps Beaver and Lee (SP-3 and SP-6, respectively).

Narrative Statement of Significance (Provide at least **one** paragraph for each area of significance.)

See continuation sheets.

Developmental history/additional historic context information (if appropriate)

Additional developmental history and historic context information is available in the Multiple Property Documentation Form, New Deal Resources in West Virginia State Parks and Forests (Sweeten 2010).

Narrative Description (Continued)

Entrance

The eastern half of Babcock State Park contains the majority of the CCC era resources, with the exception of portions of some trails that extend farther west. The main entrance to the park is off State Route 41/Stanaford Road. Stone piers flank the entrance road and a rustic stone welcome booth with adjacent stone culvert head are at the north, just beyond the piers. Shortly thereafter the entrance road forks. The southern fork leads to the headquarters area and cabins; and the northern fork leads to the Mann's Creek cabin area.

Headquarters Area

The southern fork leads down past a gable-roofed stone pump house (Photo 2) set into a slope at the roadside, past the drive to the cabins along the east side of Glade Creek, thence to a level area where the creek has been dammed. This is where the administration building sits, and a bridge crossing Glade Creek leads to additional cabins on the west side of the creek and a more recently developed Boley Lake camping area to the southwest.

The administration building (Photo 5, Figures 4 & 5) is a stone, cross-gabled building, "H" shaped in footprint and situated on the east side of Glade Creek. A small parking area at its southwest is bordered by a stone retaining wall. The administration building faces south, and a small entrance porch is set adjacent to a slightly projecting wing with an interior gable end chimney. This southern portion of the building is connected to a parallel northern portion by a transverse hyphen. Though the southern section is a single story, a change in grade allows for northern portions to be two stories. The hyphen has a second story porch with an open loggia beneath on the western elevation. The loggia expands into a flagstone terrace which leads by a series of stone steps and landings (Photos 6 & 7) to a viewing area overlooking the Glade Creek dam (Photo 4) and the handsome stone retaining wall along the opposite bank of the creek.

A bridge on stone supports (Photo 3) leads to the opposite shore and a relocated and reconstructed mill. The road then forks and the northern fork (Photo 1) follows along the side of Glade Creek with a descending embankment on the creek side and a steep slope upward on the opposite side. Along this road are several drives leading to a series of rustic creekside cabins. These log cabins on stone foundations have stone fireplaces. They are accessed by steep paths or by wooden boardwalks with steps (Photos 10 & 11). Nestled in a narrow span between a steep slope and a creek in a wooded ravine they are isolated and though fairly close to neighboring cabins, retain a sense of privacy and seclusion. The access road continues, unimproved, west to the Sewell town site at the New River. A footbridge on stone piers crosses Glade Creek to a series of cabins on the opposite bank (Photos 8 & 9) that are similarly constructed and sited.

Perched above the cabins and the creek, to their west is the Island in the Sky Shelter (Photo 12) -- a hipped roof supported by log columns on a three-sided stone foundation with interior stone benches that commands a view of the lower elevations and mountains beyond. It is accessed by the Wilderness Trail, one of the many

trails developed by the CCC, most of which either originate near the headquarters area, or intersect with trails that do.

Mann's Creek Area

North of the Headquarters Area and accessed by the north fork of the entrance road, is the Mann's Creek Area which includes a picnic area and a cabin area. The cabin area is arranged in two neighboring groups, one along a small loop drive (Figure 8) and the other along a short cul-de-sac drive (Photos 13-15), both extending west off the service road. Unlike the Glade Creek cabins, these cabins are smaller, gable-roofed cabins with fletch or board and batten siding, and chimneys, if present, are interior. While still rustic, it is a more restrained style. These cabins are set on a higher, more level elevation. In contrast to the other cabins, these have a sense of a neighborhood and lack the privacy and seclusion of the Glade Creek cabins.

Just southwest of the cabins, along a one-way loop is the picnic area. At the head of the loop is the Mann's Creek Picnic Shelter (Photo 16). A hipped roof structure supported by four tapering stone piers at each corner and intervening log columns, the shelter presides over a wooded lawn of picnic tables, stone water fountains and stone fireplaces at a scenic overlook. A parking area with a stone retaining wall (Photo 17) and the loop drive separates the picnic area from game courts (Photo 18), which are within the loop.

Support Area

A service road continues north from the Mann's Creek Area to a support area at the northeast section of the park. In addition to more recent tent camping facilities, the area includes the large, gable roofed main supply house (Photo 19) and adjacent riding stables (Photo 20, Figure 7), the Superintendent's residence (Photo 21), and small storage building. Although the residence is log, the other buildings are built in a more utilitarian frame construction with weatherboard or fletch siding. The residence also has stone entrance piers and a retaining wall. This area is accessed both by the internal park service road and from Old Clifftop Road/Route 11.

Resource Inventory

The following inventory of CCC resources includes a resource number (e.g., resource no. 1), resource name, and West Virginia survey number (also known as the Historic Property Inventory [HPI] site number), the construction date, a classification status for each resource type, and a resource count for multiple resources of similar design and construction. Resources were considered contributing if they were built by the CCC and retained sufficient integrity to communicate their historic appearance.

Resource No. 1

Resource Name: Park Roads 802 and 804 (FA-0156)

Construction Date: 1935

Status: Contributing Structure

Count: 1 road system

United States Department of the Interior

National Register of Historic Places
Continuation Sheet

Section number 7 Page 3

New Deal Resources in Babcock State Park Historic District
Name of Property Fayette, WV
County and State New Deal Resources in West Virginia State Parks and Forests
Name of multiple listing (if applicable)

Park Roads 802 and 804 were developed during the New Deal era. They were originally dirt and/or gravel or stone based. Most of the roads were not paved until the 1960s. Park Road 801, which is the location of Boley Lake, the swimming pool, and the Sugar Camp Run Picnic area was not developed until the mid-1960s and early 1970s. The same is true of the access road in the campground areas along County Route 11.

Resource No. 2, 3, 4, 5, 6, 7, 8, 9, 10, 11
Resource Name: Park Trails (FA-0157)
Construction Date: 1935
Status: Contributing Structures
Count: 10

Most of the existing trails within the park boundaries were established by the CCC. The exceptions are the Lake View Trail, the Triple Creek Trail and likely, the Mann's Creek Gorge Trail. It is believed that the CCC Wilderness Trail followed an old farm road grade, but this could not be verified. The CCC-established trails continue to follow their original alignments. The CCC trails are Ridge Top Trail (resource no. 2), Narrow Gauge Trail (no. 3), Twin Hollow Trail (no. 4), Skyline Trail (no. 5), Shortcut Trail (no. 6), Old Pond Trail (no. 7), Wilderness Trail (no. 8), Island in the Sky Trail (no. 9), Mountain Heath Trail (no. 10), and Rocky Trail (no. 11). The trails are packed soil with no curbing effect or border. The trails do not have the blaze marking typically found in manmade trails but, instead, they are marked by ongoing maintenance and use. Both keeps the trails clear of any vegetation within their alignment.

*** Note: Please refer to the accompanying map titled "Babcock State Park - Park Map and Trails" for trail locations. All trails in the Park are delineated on the map with a broken red line. Contributing trails have been delineated in yellow and their corresponding resource numbers (2-11) have been written on the map. The three non-contributing maps have been indicated with NC within a circle. ***

Resource No. 12
Resource Name: Car Bridge (FA-0159)
Construction Date: 1935
Status: Contributing Structure
Count: 1

There is one car bridge spanning Glade Creek at the junction of the Grist Mill location and the Administration Building location. The stone piers were constructed by the CCC but the upper portion of the bridge—the rails, decking, etc. -- all date to 1990 and were installed by the West Virginia Division of Highways.

Resource No. 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29

Name of multiple listing (if applicable)

There are numerous locations of stonework completed by the CCC throughout the park. The stonework is largely native sandstone. It is rough-faced (i.e., undressed) and, in most cases, laid with flush mortar joints. Surveyed and documented examples are: the stone steps (resource no.13), retaining walls (no.14), walkways (no.15), and overlook (no.16) at the Administration building including the retaining walls in the parking lot and along the creek above the dam; stone retaining walls (no.17) in front of the swings at the Mann's Creek Picnic Area; three sets of stone steps (nos. 18-20) at the Mann's Creek Picnic Area Game Courts; stone piers (nos.21) with wood rails alongside the road at the Overlook at Mann's Creek Picnic Area; a stone retaining wall (no. 22) in the parking lot for the shelter at the Mann's Creek Picnic Area; a short stone retaining wall (no. 23) at the Welcome Booth in the parking area; stone retaining walls (no. 24) flanking the entrance to Pump House # 1; stone steps (no. 25) on the Rocky Trail; stone steps (no.26) on the Skyline Trail; stone steps (no.27) on the trail to the Natural Arch; and stone steps(no.28) and walls (no.29) by Cabins #5 and 7 leading to the Upper Glade Creek Swinging Bridge.

Resource No. 30, 31, 32, 33, 34, 35, 36, 37
Resource Name: Water Fountains (FA-0161)
Construction Date: 1935
Status: Contributing Objects
Count: 8

There are eight (8) water fountains. They are made of stacked stone and have stacked stone steps. They are approximately 36" tall. Seven of the eight water fountains are located in the Mann's Creek Picnic Area and the eighth is located on the back patio of the Administration Building (also shown as Headquarters and "HQ" on sketch maps).

Resource No. 38, 39
Resource Name: Fireplaces (FA-0162)
Construction Date: 1935
Status: Contributing Objects
Count: 2

Only two stacked stone fireplaces with brick inserts remain at the Mann's Creek Picnic Area. It appears there may have been a third one. The two fireplaces are 6' X 5' X 2' tall.

Resource No. 40, 41, 42
Resource Name: Entrance Piers (FA-0163)
Construction Date: 1935
Status: Contributing Objects
Count: 3

While the entrance sign on State Route 41 at the main entrance to the park is not original, directly behind it are the original stone posts and stone piers with wood railing fencing. The hinges for the signs are extant but the sign boards are not. The same stone posts flank the entrances to each of the cabin areas and have extant hinges but no sign boards.

Resource No. 43

Resource Name: Welcome Booth (FA-0164)

Construction Date: 1935

Status: Contributing Structure

Count: 1

This rustic, one-story, gable-roofed welcome booth has a sandstone facade and foundation with horizontal wood siding in west gable end. The roof structure is supported by round logs. It has a large sandstone chimney on east elevation. The entrance porch has cut stone columns on an enclosed stone balustrade. The entrance doors retain original iron strapwork hinges and latches. It is 2 X 2 bays and measures roughly 15' 5" X 13'.

Resource No. 44

Resource Name: Pump House #1 (FA-0165)

Construction Date: 1935

Status: Contributing Structure

Count: 1

This rustic, one-story, gable-roofed pump house has an asphalt shingle roof with a wood louvered vent in the gable. The facade and foundation are stacked stone. Stone retaining walls flank the entrance door. The Pump House is partially below grade with its sides and rear built into the hillside. Stone steps lead to its entrance. The original iron door hardware remains. It is 1 X 1 bays and measures roughly 14' X 19'.

Resource No. 45

Resource Name: Park Headquarters and Administration Building (FA-0166)

Construction Date: 1935

Status: Contributing Building

Count: 1

This large, rustic, two-story, "H" plan building has an asphalt shingle roof and four interior chimneys. The facade and foundation are cut sandstone. Windows are generally 4- and 6-pane windows with rusticated stone lintels and sills; some are paired. The main entrance is supported by square wood posts with simple brackets. The building has a rear patio overlooking the creek and dam. It is 6 X 10 bays and measures roughly 56' X 89'6".

Resource No. 46

This 150' long stone and concrete dam spans Glade Creek to create a swimming area just below the Administration Building, though the swimming area has not been used since c. 1970 when a new swimming pool was constructed by Boley Lake. The gate in the dam is no longer operational.

Resource No. 47

Resource Name: Island in the Sky Trail Shelter (FA-0168)

Construction Date: 1935

Status: Contributing Structure

Count: 1

This, the only trail shelter in the park, is a rustic, one-story, hipped roof shelter with an asphalt shingle roof. The roof structure is supported by round log columns on an enclosed stone wall/ balustrade. The shelter has a stone floor and foundation. It is 1 X 1 bays and measures roughly 16' X 16'.

Resource No. 48

Resource Name: Upper Glade Creek Foot Bridge (FA-0169)

Construction Date: 1935

Status: Contributing Structure

Count: 1

This footbridge on stone abutments over Glade Creek between Cabins 5 and 7 is a wood frame bridge with a cable suspension -all modern- on historic sandstone abutments. The Narrow Gauge Trail and the Skyline Trail can be accessed via this bridge.

Resource No. 49

Resource Name: Cabin No.16 (FA-0170)

Construction Date: 1935

Status: Contributing Building

Count: 1

This rustic, six-person, one-story, cross-gabled cabin has an asphalt shingle roof with a central interior stone chimney. It sits on a solid sandstone foundation and is clad in board and batten siding. Windows are modern replacement 1/1 windows with simulated divided lights. The facade has a projecting gabled entrance porch supported by square columns with simple "Y" brackets and an enclosed board and batten balustrade. It retains historic iron door hardware. It is 4 X 3 bays and measures roughly 30' X 29'6".

Resource No. 62, 63
Resource Name: Game Courts (FA-0183)
Construction Date: 1935
Status: Contributing Object
Count: 2

The Game Court area includes a tennis court, basketball courts, volleyball court, shuffleboard courts and a concrete ping-pong table that consists of four round concrete columns with a concrete slab top. The only resources that date to the CCC are the shuffleboard court and the ping-pong table. The original tennis courts were located where the current Activities Shelter is now located.

Resource No. 64
Resource Name: Mann's Creek Picnic Shelter (FA-0184)
Construction Date: 1935
Status: Contributing Structure
Count: 1

This rustic, one-story, hipped-roof, picnic shelter has an asphalt shingle roof supported by corner stone buttresses with round log columns and rails in between the buttresses. It has a stone floor and foundation. It is 3 X 1 bays and measures roughly 30' X 20'.

Resource No. 65
Resource Name: Main Supply House (FA-0185)
Construction Date: 1935
Status: Contributing Building
Count: 1

This large, rustic, two-story, side-gabled supply building sits on a stone foundation. It has a central, two-story, gabled projecting entrance bay with a forebay supported by large knee braces. The asbestos shingle roof has a central louvered cupola. It is clad in horizontal board siding. The 6- and 9-pane wood windows have horizontal iron bars. There is a small gabled wing on a gabled end with a herringbone freight door with original iron hardware. Entrance bay has double herringbone freight doors with original iron hardware flanked by 6-pane windows. A modern entrance deck has been added. There is a shed-roofed open storage addition at the rear. It is 8 X 2 bays and measures roughly 110' X 24'.

Resource No. 66

Resource Name: Riding Stable (FA-0186)

Construction Date: 1935

Status: Contributing Structure

Count: 1

This rustic, two-story, gable-roofed barn/riding stables has an asphalt shingle roof with two louvered cupolas. It sits on a concrete block foundation and is clad in fletch chestnut siding. It has 6-pane wood windows. There are double Dutch doors on the south elevation; a small entrance porch on the north elevation; and an entrance stoop on the rear elevation. It is 3 X 8 bays and measures roughly 33'6" X 74'.

Resource No. 67, 68, 69

Resource Name: Superintendent's Residence (FA-0187)

Construction Date: 1935

Status: 1 Contributing Building, 2 Contributing Objects

Count: 3

This rustic, one-story, house has side-gabled wings on each end which appear to be original. It sits on a sandstone foundation and has an asphalt shingle roof and two sandstone chimneys. The central portion of the house is built of round log construction with saddle notching at the corners; the wings are clad in T-111 siding. It has modern replacement windows, some with simulated divided lights. At the main entrance is a flagstone patio. A small side porch has square posts and wood rails. There is a stone retaining wall (object) at the driveway and stone entrance piers (objects) at the head of the driveway.

Resource No. 70

Resource Name: Storage Building/Pump House (FA-0187A)

Construction Date: 1935

Status: Non-Contributing Structure

Count: 1

This one-story, gable-roofed pump house was originally located behind the Superintendent's Residence. It has been moved a short distance to a similar setting behind the Activities Shelter, located just to the northwest of the Superintendent's Residence. It sits on a concrete block foundation. It has two rooftop cupolas on an asphalt shingle roof. Cladding on the long elevations is horizontal board siding, and on the gable ends board and batten siding. There are 4-light wood windows on each end. It is 1 X 1 bays and measures roughly 19'9" X 9'. (The date of the structure's move could not be determined. For this reason, the resource is classified as non-contributing.)

Dry stone stacked culvert heads are located along the park roads. Due to frequent flooding and routine road maintenance, few New Deal-era culverts are extant. One culvert head that appears to maintain its original configuration was documented along the creek at the main park entrance.

Resource No. 85

Resource Name: Designed Landscape

Construction Date: 1934

Status: Contributing Site

Count: 1 (system)

Despite some changes, Babcock State Park retains its overall, original New Deal-era landscape design. The park's 4,127 acres are primarily covered with forests of native hard- and softwood trees, both deciduous and coniferous. Since the 1930s, the natural areas have been actively managed using standard forestry practices. Babcock retains its CCC road network, trail network, bridges, and stream with CCC built dam, all designed to be rustic and unobtrusive. Native stone quarried in the area is used for steps, walls and terraces. Buildings and structures are built in a rustic style dubbed "parkitecture" using native stone and logs to blend into the natural setting of the park. These resources have been carefully maintained by the park to preserve the naturalistic elements of the CCC/NPS design tenets of the 1930s.

Resource No. 99, 100, and 101

Resource Name: Park Trails (FA-0157)

Construction Date: post-1950

Status: Contributing Structures

Count: 10

Most of the existing trails within the park boundaries were established by the CCC; however, three exceptions that post-date CCC activity exist in the Park: the Lake View Trail, the Triple Creek Trail and likely, the Mann's Creek Gorge Trail. The trails are packed soil with no curbing effect or border. The trails do not have the blaze marking typically found in manmade trails but, instead, they are marked by ongoing maintenance and use. Both keeps the trails clear of any vegetation within their alignment.

*** Note: Please refer to the accompanying map titled "Babcock State Park - Park Map and Trails" for trail locations. All trails in the Park are delineated on the map with a broken red line. The three non-contributing maps have been indicated with NC within a circle. ***

Statement of Integrity:

The CCC resources in Babcock State Park retain integrity of location as they have not been moved from their original locations. None of the resources have had any significant changes to design, so they retain high integrity of design. Some additional resources were added west of the CCC-developed part of the park and twentieth century plans to introduce mining in and around the park were thwarted, thus the natural landscape in the western half of the park, while gently managed, continues to provide a high degree of integrity of setting. While there have been some changes in material, notably with the introduction of composite shingle

roofing, road pavement (in the form of asphalt), and replacement bridge decking, the integrity of materials remains relatively high with the retention of most of the wood and stone elements throughout. Likewise, the retention of most of the material in the CCC resources has preserved workmanship thus this integrity is high. The high integrity of location, design, setting, materials, and workmanship contribute to a high degree of feeling and association, as does its continued use as a park.

Narrative Statement of Significance

Babcock State Park, prior to 1934

The area that is now Babcock State Park was heavily mined and timbered as early as the late 19th century. The Longdale Iron Company mined there and built a narrow-gauge railroad along Mann's Creek to transport material out of the canyon. The narrow-gauge line joined the Chesapeake & Ohio Railroad (C&O) at the town of Sewell, the site of which is on the New River, on the western side of the park. Longdale established the town of Sewell and neighboring Clifftop. Sewell contained coke ovens and a tippie. The railroad bed is now the Narrow Gauge trail.

By 1908 the coal reserves were depleted, and the land was sold to the Sewell Lumber Company in 1908. It later passed to the Babcock Lumber Company which continued to use the narrow-gauge railway. During the Great Depression, E. V. Babcock sold a large parcel to the state of West Virginia to establish a state park. Babcock also sold land in Tennessee that was the impetus for the Great Smoky Mountains National Park. An obituary for C. N. Proctor, a member of the West Virginia House of Delegates (1933-35) and sometime employee of the Babcock Lumber Company, credits him as the impetus for the transfer of land to the state.

The New Deal era at Babcock

As part of the New Deal, President Franklin Delano Roosevelt combined the creation of jobs to spur the economy with programs to invest in public infrastructure across the nation. One focus of these programs was to create parks and recreational resources for the public. While the Civilian Conservation Corps (CCC), created in 1933, had an express mission to address flood control, prevent soil erosion, manage forestry, and other broad environmental policies, it also worked to create public recreational assets. The CCC's efforts in Babcock State Park addressed both environmental and tourism goals.

According to Milton Harr, in his book *The C.C.C. Camps in West Virginia 1933-1942*, the first CCC camp at this location was SP-3, Camp Beaver, established in 1934, followed by Camp Lee, SP-6, established the following year. The "SP" indicated that the camps were operating under the aegis of the Division of State Parks of the Conservation Commission. The division had the mandate to develop state parks and worked closely with the CCC in its early years. Eight of the nine camps authorized for work in the parks were established by the division.

Camp Beaver was established May 14, 1934. CCC Company 1552, stationed at Camp Beaver, worked on the administration building, dam, and the cabins along Glade Creek. A year later, Camp Lee was established. Its workers were tasked with building cabins, game courts, roads and trails. Both camps were located in the supply area in the northeastern area of the park. Each had about 200 men. Among them, or working with them as a contractor, was an Italian stonemason who supervised several other Italian stone masons living in the Fayetteville area who are credited with the stonework at the administration building (Figure 6) and Glade Creek dam.

A *Beckley Post-Herald* article in 1936 notes the park design which has concentrated the built elements in a few locations in order to preserve the park's natural beauty. "Those responsible for the planning of Babcock State Park have kept this one point constantly in mind, with the result that the greater part of the park is available only by foot and horse trail. An attempt has been made to retain most of the developed projects in one area. This particular section is fairly close to the main entrance of the park; its nucleus being a large stone administration building that houses a park store, grill room, bath house, caretaker's quarters, museum and recreation room."¹ At that point in time, five cabins had been completed and 25 more were planned. The initial work was completed near the main park entrance, all "deep in the cool shadows of the gorge that extends the entire length of the park."² The plateau area near Mann's Creek, not yet open, included the picnic shelter that was at that point under construction. The article also noted the park's water system. "Clear cold spring water is drawn from the well and stored by a pumping system to the administration building and to various cabins by means of gravity flow."³ The superintendent's residence was complete, and the nearby stables were planned.

The article noted that Babcock State Park was a reminder that the region had more to offer than just timber and coal. "This State Park work has doubtless done more than any other one thing in bringing to the minds of the citizenry of this and neighboring states that West Virginia is a state rich in the charm of historical lore and captivating in its kaleidoscopic and panoramic beauty...Babcock State Park with its masculine vigorous topography will do its part to this end."⁴

By 1937, the Island in the Sky shelter had been completed. Roy Lee Harmon noted in the *Beckley Post-Herald*, "The CCC lads from Camp Beaver and Camp Lee have been very busy. There are 290 boys in the two camps. And don't let anybody tell you that the life of a CCC lad is all play. I saw groups of them making roads, getting out stone for the finishing touches on some of the buildings, driving trucks and doing the work of he-men. Again, the idea came back that the greatest thing the New Deal gave this country was the CCC organization."⁵ Harmon reported on the progress the CCC workers had made to date. "Superintendent Baldwin said that they boys in the camps are devoting no time to reforestation at present. Their work consists wholly of erecting buildings, making roads and similar activities in order to get the park completed shortly. Seventeen miles of telephone line were strung in the park, five and one-half miles of roads have been finished and 14 miles of bridle paths have been completed."⁶

Contemporary articles about Babcock stress the construction work at the park, with scant acknowledgement of the conservation work completed on site. While poorly documented, it is known that mining, timbering, and fires had damaged the landscape and that part of the work of the CCC was to restore the vegetation that supported both wildlife habitat and water quality within the park.

CCC Camp Lee superintendent James Baldwin was appointed the first Superintendent of Babcock State Park in 1937. It is believed that Camp Beaver was closed in August 1937, and Camp Lee in the spring of 1942.

Babcock State Park in the post-New Deal era

In the late 1940s and early 1950s, the park was threatened by coal mining activities both inside and outside of the park. In 1948 *The Raleigh Register* reported on a proposal to allow strip mining on 188 acres inside the boundaries of the park. It states that State Conservation Commissioner Jack Shipman justified the proposed lease as it would have "no effect on recreational facilities. He explained that the tract is in the extreme western portion of the park and that no recreational program had even been planned within two miles of the coal acreage involved."⁷

Local opposition was quick, strong and vocal. A January 8, 1948 article in the *Beckley Post-Herald* published a protest letter from the local Kiwanis Club. They noted the destruction of natural features from strip mining and concluded, "We, as citizens of our great state, are proud of its scenic beauty, and have been heartily in accord with the acquisition and development of our state parks, and it would be a grievous hurt for elected representatives to consent to or permit their desecration in any manner."⁸ The Kiwanis Club was not alone. By the next day the *Raleigh Register* noted additional protest. It was disclosed that the State Department of Mines and the proposed contractor had already invested \$1,500 to assess the coal in the park. The Conservation Commission noted that any drain would be diverted from Babcock's trout streams into the New River. Hedging his bets, Commissioner Shipman "expressed his personal disgust at strip mining in West Virginia in general, but stated, 'several persons and firms have said the state is passing up a marvelous opportunity' (by leaving the coal in situ)."⁹ Shipman contended that lease proceeds could be used to support park operations. "Shipman said he realized it would appear to be incongruous for the Conservation Commission to lease park land for strip mining purposes, with most people in the state opposed to strip mining in general."¹⁰ In the *Beckley Post Herald*, Shipman estimates the lease revenue at \$75,000- \$100,000.

However, protests continued to mount, noting the irony of opening land purchased from a mining operation to be used as a park to be strip mined. Even the United Mine Workers voiced opposition to the plan. By the 14th of January the plan was scrapped. An editorial in the *Beckley Post Herald* celebrated the protection of the park, with a note of cynicism: "When we exposed the proposed Babcock strip mining deal, we had no real hope that the people would actually raise their voices in protest to this raid on their rightful heritage...but for once they did howl, and their howling accomplished its purpose in one short week. The governor and state conservation commission were shocked up out of their well-padded chairs when telegrams and letters started pouring in from indignant citizens, civic clubs, garden clubs, sportsmen's organizations, Chambers of

Commerce, and other aroused bodies, and the net result was that the commission withdrew its vicious order and Babcock State Park is saved from the strippers, at least until after next election."¹¹

Although plans to mine within the park had been defeated, strip mining continued to impact the park. Operations upstream had left Babcock's streams and swimming areas muddied and silted. Mining trucks damaged park roads. Tourism numbers were down at Babcock and the effects of local mining operations appeared to be a contributing factor. Promotional articles praised the park's 20 miles of trails, its 5 miles of park roads surfaced with crushed sandstone, the 26 cabins, swimming pool, trout fishing, and scenic picnic area.

In 1952 the A. T. Massey Coal Company of Richmond, Virginia which had coal rights outside of the park sought to expand the historic narrow-gauge railroad right-of-way within the park, working in collaboration with the C and O Railroad, to ship coal through the park. Potential impact was represented as minimal with a large tunnel under the administration building and the destruction of only two cabins.¹²

The press was less strident in its opposition to this plan and noted that water quality might improve as Massey had suggested building settling basins above the park, and that rail transit would take coal trucks off the park roads.¹³ The water quality issue was at the forefront of arguments about local mining. An editorial in *The Raleigh Register* noted, "Seven or eight years ago Babcock's major fishing and swimming stream, Glade, was crystal clear. ...Today that stream is almost dead and virtually dries up in drought periods. Babcock park (sic) has so suffered the ill effects of strip mining that today cabins stand empty at the height of the vacation season. People simply don't like swimming in muddy water, and when they can only fish outside the park they would just as soon go elsewhere."¹⁴

A public meeting in September 1952 was dominated by mining proponents who suggested the public should not interfere in private property rights, nor limit a company's ability to profit from their land, nor threaten the prospect of new mining jobs in the local economy. One coal executive from a neighboring operation "said he didn't think Babcock amounted to much as a park...(and) the state should examine the possibility of abandoning it and taking money from the purchase for development of a better park elsewhere."¹⁵ And while the Conservation Commissioner's comments were lukewarm, "Kermit McKeever, chief of the division of state parks, said the state and federal governments have an investment of between \$3.25 and \$3.5 million in Babcock and went on to say that he believed the rail line would ruin the beauty of the park and make useless most of the cabins."¹⁶ In October 1952, the state Conservation Commission unanimously opposed the rail project noting its adverse impact on the park and that there were other transit options available. In 1953, the *Beckley Post Herald* noted that cabin bookings were down likely due to confusion

about the mining and railroad controversy but that the streams and swimming area were clear and stocked with trout. Additionally, a new road had been built outside the park boundaries for coal trucks, and the park roads had been re-surfaced, and the 26 cabins had been renovated.¹⁷

In the 1960s a tent cabin area was added to the park.¹⁸ Additional acreage was purchased, and a dam built to create Boley Lake along with a boat house, dock and new access roads. A swimming pool was also added at that time. In 1976 a grist mill recreation, which included parts of local Cooper's mill, was assembled on Glade Creek opposite the Administration Building.

Significance and Integrity

The Babcock State Park historic district is associated with all four of the historic contexts described in the New Deal Resources in West Virginia State Parks and Forests Multiple Property Listing.

Babcock is significant for its association with State Park and Forest Development in West Virginia, 1933-1942 and the areas of significance of Conservation and Entertainment/Recreation. The state of West Virginia acquired the land that would become Babcock State Park in 1938 from the Babcock Lumber Company. CCC work on the site both prior to and after the state's acquisition of the property addressed recreational and conservation values including the construction of cabins and picnic areas.

Babcock State Park is significant for its association with New Deal Federal Relief Programs in West Virginia State Parks and Forests from 1933 to 1942 in the areas of Politics/Government and Social History. The CCC provided job training, employment, and income to participants during the Great Depression. Their work at Babcock and elsewhere created public infrastructure including natural conservation projects, forestry programs, fire protection improvements, transportation resources through roads and trails, and recreational facilities. These investments not only served the CCC members and the public during the Great Depression but have continued to serve their communities and the nation at large to this day.

Babcock's rustic style resources make it significant for its association with Rustic Style Architecture in West Virginia State Parks and Forests, 1933-1942 under the area of Architecture. Major features including the cabins, picnic shelter, superintendent's residence, and hiking shelter are excellent examples of rustic "parkitecture" promoting the use of natural, local materials such as wood and stone, often roughly finished.

Babcock State Park's overall landscape plan (Figures 1-3) makes it significant under Landscape Design and Landscape Management in West Virginia State Parks and Forests, 1933-1942. Placement of recreation resources in tight clusters, and using rough natural materials allowed buildings and structures to be unobtrusive and not detract from their natural setting and appearance, providing visual harmony. The continued management of the natural areas since the New Deal era reinforces both integrity and significance

VERBAL BOUNDARY DESCRIPTION

The boundary of New Deal Resources in Babcock State Park Historic District is shown on the two accompanying maps entitled "Babcock State Park, Fayette County – West Virginia."

BOUNDARY JUSTIFICATION

The historic district boundary encompasses the entirety of Babcock State Park, which was established during the New Deal period. The extant cultural and managed natural resources have continued with integrity since that period.
